Full-Stack Engineer | Sheridan, WY | mma.ayoub@outlook.com | GitHub | Trailblazer | Portfolio

Personal Summary

Full-Stack Engineer at AgTerra Technologies (May 2024 – Present), building web and iOS product software: a React.js and .NET 8 admin application, ASP.NET and Blazor interfaces, MapItFast iOS, and SQL Server services. Previously a software developer at Raven Industries, integrating e-commerce and Salesforce with the ERP using C#, Azure, Boomi, and Oracle.

Education

AUG. 2015 – MAY 2020 | SOUTH DAKOTA STATE UNIVERSITY | B.S. ELECTRICAL ENGINEERING

Major: Electrical Engineering GPA: 3.2
Minors: Mathematics

Experience

MAY 2024 – PRESENT | SOFTWARE DEVELOPER | AGTERRA TECHNOLOGIES | SHERIDAN, WY

- Developed a self-service admin web application for client management of users and permissions, utilizing React.js, TailwindCSS, and .NET 8 API.
- Built user interfaces with ASP.NET, incorporating SASS for styling and jQuery for interactive features.
- MapItFast iOS UI development and enhancements.
- Streamlined support ticket workflows through automation with Trello integration.
- Designed and implemented a database logging library using .NET Standard 2.0 and SQL Server.
- Revamped and modernized a custom enterprise website, including database restructuring and UI upgrades, using SQL Server, SASS, and Blazor.

OCT 2020 – SEP 2023 | SOFTWARE DEVELOPER | RAVEN INDUSTRIES | SIOUX FALLS, SD

- Integrated the e-commerce web site to Raven's new ERP system using C#, Azure Web App, Message Service Bus Queues, Web Job, MSSQL, and Oracle SQL.
- Integrated a third-party CRM (Salesforce) with Raven's ERP system using C#, Boomi, and Oracle; then rebuilt the integration with a .NET SOAP library and console apps to sync ERP and Salesforce.
- Integrated the IT ticketing system (Ivanti) with Azure DevOps using .NET 6 C#.
- Developed Salesforce LWC, Aura, and APEX classes to enhance Raven's business processes.

JUNE 2020 – AUG 2020 | BUSINESS ANALYST | FLEXON TECHNOLOGIES

- In-depth knowledge of **Software Development Life Cycle.**
- Extensive experience with **SCRUM** to accommodate requirement changes and **promote flexibility.**
- Ability to **elicit, analyze, gather, document, and prioritize requirements and specifications** for complex and simple projects.
- Extensive experience in **querying SQL databases** for data analysis purposes.

AUG. 2019 – MAY 2020 | SENIOR DESIGN PROJECT | DAKTRONICS

- Designed a device that can gain physical access to the network settings of Daktronics's display controllers (host device) and to reconfigure those network settings as needed.
- Responsible for programming the microprocessor and the C# application that allows the microprocessor to communicate with the host device.
- Created a setup file for the C# application for easy installation of the C# application.
- Designed and built the PCB for the device.

MAY 2018 – AUG. 2019 | APPLICATION ENGINEER INTERN | SENCORE INC.

- Led the software and hardware testing for Sencore and WELLAV products to ensure products met or exceeded specifications.
- Responsible for determining the root cause of customer reported issues and reporting the results to the Application Engineering team for resolution.
- Collaborated with the Engineering department to enhance the stability and performance of development products.

SEPT. 2017 – MAY 2018 | TECHNICIAN | SDSU PERFORMING ARTS CENTER

- Responsible for running wires to the stage speakers and setting up the lighting system.
- Troubleshooting defective equipment during live performances.
